

LOCAL MATTERS.

**To The Public.**  
I hereby decline being a candidate for the office of sheriff.  
**WILLIAM HOLLIDAY.**  
July 21st, 1871.

Mr. Frost, editor in chief of the Independent, is on the sick list, and has gone home to New Lisbon. During his absence, which we hope will be brief—the "sub" editor and "devil" are authorized to receive all donations of peaches, apples, and suchlike, which his friends may desire to leave at this office.

The Primary Meeting of the republicans of this county takes place on next Saturday, at which time will be decided who of our many aspirants for office are to be favored with what they all expect to get. Some of them will be disappointed.

Col. Taylor, formerly editor of the Alliance Monitor, is now preaching in a Methodist congregation at Jamestown, N. Y.

It only requires a stroll about town to convince the most sceptical person that our city is improving very rapidly. On every hand new residences have been built or are in course of erection, while the repairs to old buildings are without number. Masons, carpenters and painters, as well as all other classes of mechanics are having a busy time here this season.

The Grand Jury have found an indictment for forgery against Rev. A. B. Way, formerly a preacher in the Disciples church at Alliance.

We have lately received a new lot of paper for bill heads, letter heads, circulars, and fine work generally, also, a good assortment of envelopes which we are prepared to print up for our patrons and friends at short notice and reasonable rates.

New wheat is coming into this market in considerable quantities at prices ranging from \$1.20 to \$1.27. It is of good quality, and the crop is said to be large.

Among recent inventions which will undoubtedly have a wide popularity, is an article known as condensed soda water. It is put up in boxes, containing material for about twenty glasses of as pure soda water as can be drawn from any fountain. The powder is flavored with pine-apple, orange, lemon, &c., ready for use, and a picnic party can carry their soda fountain in their pockets.

About two hundred mormons passed through this city a few days ago, on their way to Salt Lake.

Those who are in the habit of handling \$20 bills should be on their guard. A very dangerous counterfeit of that denomination is in circulation. No danger of them troubling the printers.

We understand that a lot of lazy scamps have contrived another mode of robbing the people of their money. The modus operandi consists of a man going to farm houses, engaging boarding for a week or two, and traveling over the country for the ostensible purpose of selling recipes for making soap. The scamp stays long enough to rob the farmer of all valuables he can get hold of, and travel on to hunt a new victim.—Columbian Register.

We are informed that Dr. Boon, who came to this place a short time ago for the purpose of practicing his profession—while crossing the railroad bridge over Erie street, got his feet tangled in some way and fell through, receiving internal injuries of a serious nature.

The circus on Saturday night a large crowd of people to town, notwithstanding the rain, and for hours our streets were thronged with vast numbers of humans, some of whom came to see the show and others to transact business. Our merchants and tradesmen had a busy day.

Peaches, tomatoes, apples, green corn, plums, and other varieties of early fruits and vegetables are quite plenty in this market.

One day last week, a man whose name we have been unable to learn, who resided about one mile south of Greenville, dropped dead from a chair on which he was sitting, reading a newspaper. He was in good health, apparently, but a short time before. His sudden death is supposed to have been caused by heart disease.

The Howard Association, of Philadelphia, devoted to the exposure of various social evils, is an institution which can be relied upon as trustworthy and honorable. We have had business transactions with the managers for several years, and have found them in every way reliable. The card of the association will be found in our advertising columns.

We notice by our exchanges that the small pox is quite prevalent in many localities in this vicinity. It has not yet made its appearance in Massillon, and we hope our people will not be troubled with this loathsome disease; yet, its proximity to us behooves our citizens to see that their cellars, drains and out buildings are free from filth of all kinds. A cheap disinfectant is readily obtained by dissolving a bushel of salt in a barrel of water, and with the salt water slack a barrel of lime, which should be wet enough to form a kind of a paste. Use it freely in and about sinks, cellars, and barns, and in this way prevent sickness, suffering and expense.

Prof. Atwater, of the Disciples church, delivered his farwell discourse on Sunday last. During the time that the professor has been connected with the congregation in this place he has made many warm friends, all of whom regret that he is about to leave this neighborhood. We understand that Mr. A. intends locating somewhere in York state.

Reunion.—The 4th annual reunion of the 104th O. V. I. will take place at Massillon, September 8th, 1871. Let every member attend. Wellsville, Salem, New Lisbon, Minerva, Alliance, Canton, Akron, Ravenna, and all other papers in the neighborhood please copy.

**A SAD CATASTROPHE.**—Prof. Torres, the aeronaut attached to Grady's Circus, which exhibited here on Saturday last, came to his death in an entirely unexpected and unexpected manner. At the close of the afternoon performance the balloon was inflated with hot air and smoke, and about six o'clock was cast loose from its moorings, and the professor ascended toward the clouds, with the professor dangling on his trapeze beneath, performing a series of astonishing and difficult gymnastic feats. After mounting to the height of several hundred feet, the balloon began to descend, and came down in the canal, a short distance south of the residence of Gen. Kent Jarvis. The professor having neglected to take a life-preserver with him, and being unable to swim, was drowned before assistance could reach him. Several persons who had gone down the road to see him land, witnessed the accident, and hastened to render their aid, but were too late to save his life. Mrs. Reed, Ridenour and others, were summoned, who hurried to the place and did all that medical knowledge or human ingenuity could devise to restore him, but the vital spark had fled never to return. Prof. Torres was apparently about 30 years of age, was a native of Spain, and seems to have been a general favorite with the company. His remains were buried on Sunday in the English Catholic cemetery, and were followed to their last resting place by the entire circus company as well as a large number of sympathizing citizens.

The present season has been one of rank growth to vegetation—the earth is covered with rich, luxuriant green. Such superabundance of vigor in nature, according to pretty well established theory, necessarily exercises some influence on the atmosphere, permeating the same with a certain degree of miasm. This has an influence on the health; and in sensitive cases develops inflammatory or acute diseases in the shape of fevers of various classes, proving more or less serious to those susceptible to such influences. For this reason it becomes necessary for those with delicate constitutions to be cautious in their living, obeying the injunction. Be temperate in all things, indispensable need to preserve life, and abstemious in those uses of which, are necessary to bad consequences—especially intoxicating liquors.

Another new manufacturing enterprise is contemplated, and perhaps is in progress of construction, not exactly in town but in the vicinity, and that is an establishment for making drain pipe. The increasing demand for this useful material, especially among our farmers who have portions of land which cannot be successfully used for cultivating and raising grain, makes it necessary to resort to draining in order to increase their facilities for doing so. Abundance of good clay for this purpose is to be found in many places, and an enterprise with a proper degree of skill will make it available for the purpose above indicated.

Every little while we observe that some conscience stricken sinner, who has disgraced his manhood by neglecting to pay his honest debts, or has defrauded another by rascality, theft or other method of wrong, has been lashed into honesty by the still small voice, conscience, and made restitution by paying off an honest debt. It may not be impertinent to ask if a goodly number of newspaper publishers are not entitled to a pretty large share of conscience money from delinquent subscribers, scattered all over creation? The writer of this knows of several such delinquents, of fifteen or twenty years standing, who, if they don't "cease to do evil and learn to do well," will feel rather bad when Gabriel blows his horn and summons them to judgment for cheating the printer.

Another improvement is about springing up here, and that is a foundry and repair shop. A frame building for this purpose has just been erected on the northeast corner of Myers and Willson's premises, by Joseph Genet, a mechanic of much experience and skill as a moulder. This is but another evidence of the steady, successful advancement of our city on the way to prosperity.

On Monday and Tuesday of last week members of the Odd Fellow fraternity had a large and enthusiastic gathering at Cleveland. A delegation of 300 or 400 was present from Canada, who were heartily welcomed by their brethren. Speeches and social entertainments were the order of the day. Massillon was liberally represented by members of the Order.

The heavy rain which we had here last Wednesday was extensive—it was quite as hard in many other parts of the country, and the wind was destructive in some localities. But a few miles from here to the northwest, hail fell of such size and in quantity sufficient to be very damaging to the corn. Thursday was quite cool, and in some places strokes were fired up, as it was uncomfortable without their heat. In certain places in Illinois, some ten days ago, the cold was so severe that a hard frost killed a considerable quantity of corn. The mischief thus done was not extensive. This is one of the years when frost can be seen every month—or it has been so thus far.

There is a practice in our midst which should be done away with at once. We refer to that of stopping horses and wagons on the street crossings while the drivers are in conversation with somebody they may chance to meet. Persons on foot have some rights, and it is not always pleasant to walk around.

One of the light-fingered gentry, who gave his name as W. Jarvis, and claiming to come from Toledo, was arrested here on Saturday, being caught in an attempt to pick the pocket of a woman while standing in the crowd near the circus tent. He was taken before Esquire Warner, found guilty, assessed ten dollars and cost, and committed to the city prison until paid.

A large number of our citizens accompanied by the choir of St. Mary's church, the Massillon Silver Cornet Band and Bar's string band, went to Fulton on Sunday morning last for the purpose of assisting in the ceremonies connected with the dedication of the new Catholic church in that place.

The American Odd Fellow appears this month under new and most encouraging auspices. Mr. Orange Judd, proprietor of that well known and popular publication, the American Agriculturist, has taken the presidency of the American Odd Fellow Association, and it is now placed upon a surer basis than ever before. The magazine is destined to become one of the most attractive and entertaining publications of the age, and as a fraternity and family magazine is calculated to prove exceedingly popular everywhere. The contents of current number are rich and varied, and include several elegantly illustrated articles. The A. O. F. is sure to succeed. Published by the A. O. F. Association, No. 96 Nassau Street, New York. \$2.50 per year; \$1.25 per vol.

For some time past efforts here have been made by our colored citizens to raise money enough to purchase the instruments necessary to equip a brass band, and we are pleased to learn that they have been so far successful, that they intend sending for their "horns" next week. They have raised by subscription, the sum of \$1.50, and we are informed they still stand in need of a like amount in order to complete the purchase, and wish us to state that they shall call on those of our people who have not already contributed, to help them along. We hope our public spirited citizens will aid them in their enterprise.

Mr. J. E. McLain and Jos. Coleman of this city, started on Sunday for a trip to California and Oregon. We wish them a pleasant time and safe return.

**DELAYS ARE DANGEROUS.**—Mothers, as you love your offspring, don't fail to use Mrs. Whitcomb's syrup for soothing children. Read the advertisement in another column.

We this week publish another article, the production of the writer signing himself Progress. It will be seen that he radically differs from many of the teachings on the points he discusses. Let nobody be alarmed or excited by this free expression of thought. If found to be right the positions of the writer will prevail, if wrong, of course they will fail as they should. Some one has very truthfully said, that the agitation of thought is the beginning of wisdom. It is a whole some position, for it keeps the world from rotting in absolute stagnation.

By reference to our advertising columns it will be seen that Mr. D. W. Huntsman offers for sale a desirable property located on the corner of Main and Grant streets, in West Massillon.

We understand that Kelley & Peppers finished burning their second kiln of brick yesterday, and from appearance, so far, it was a good burn.

On Monday we had the pleasure of receiving a call from our old friend, Mr. Howard Coo, formerly a resident of this vicinity, but who now resides at Elkhart, Indiana. He is looking well, and seems to be prospering in his new home.

ON FURLOUGH.

Mr. INDEPENDENT.—Mrs. Bedett once told a friend she "enjoyed very poor health," in answer to an inquiry concerning her welfare. Just now I am in a similar predicament, but can say that I enjoy the condition sufficiently to regard it as a luxury. Having had an experience of some five or six weeks of typhoid fever, a very uninviting guest, one year ago, and a liberal supply of pills, poisons, powders and all that sort of confections, to get rid of the fever, I feel like taking the requisite precautions to avoid a repetition of a similar campaign, indications of which were making them selves very manifest during the last few days.

Hence the furlough. Last Friday morning I started from Massillon for New Lisbon, with the idea of dodging if possible, the malignant embrace of that sweetly debilitating and often fatal visitor, but whether his darts can be evaded or not is the question, for he draws a strong bow, takes fine sight, and frequently sends his target over Jordan without the benefit of clergy. The most rickety human corporation has more or less of that instinct of vitativeness or love of life that marks all things living, and I acknowledge a reasonable share of this feeling. But if my time has come and this threatened contingency must prove a fatal one, it is not for me to complain, for I cannot alter the decrees of fate or nature, or whatever power controls in such cases made and provided.

But enough of this, for I dislike howling, even if done by pen or pencil, and reverberated to the world through the instrumentality of that giant magician, the printing press, which never has less than a whole world for its audience. "Cheerfulness, thou buoyant spirit," is a philosophy which ought to be more cultivated than it is, and the whole race of humanity will be the better for its universal application.

On the way here I observed that most of the farmers have taken in their wheat, many are cutting fine crops of oats, the corn looks most promising, and potatoes are unusually good—so that they sell in some places for 50 cents a bushel. One farmer was plowing; preparing for future crop.

New Lisbon is yet here, somewhat advanced in years, having attained its three score and ten, but in consequence of a combination of causes is not as large as many places of fewer years. For many years it was at a

stand still, if not in a state of retrogression, but is now recuperating, improving in the way of buildings. More houses are going up than usual and of better construction. The courthouse, I may say, would be an ornament to any city, as it is of fine proportions, faced with the best of building stone, an unlimited amount of which is near town, as great hills have their back bones made of this material. Many of the citizens here, as well as visitors, think this seat of justice should have been in a more elevated position.

I am informed that a project is on foot to build a narrow gauge railroad from Akron to Alliance, and on to New Lisbon, the object being to reach the coal fields in this vicinity, of which there seem to be exhaustless supplies, and that of the very best qualities for many purposes. Capitalists will make good paying investments by such an improvement. In addition to this rich coal there are vast layers of iron ore, and that of excellent quality, as has often been ascertained by experiment. Then there are great boulders as well as smaller pieces of limestone, cement lime, firebrick clay—12 short the mineral resources here seem wealthy in unknown quantity and excellence. Enterprisers will develop riches in this vicinity.

Thus far in this siege I have pretty well succeeded in keeping those unpalatable doctor stuffs outside of my corporation, and shall avail myself of rest and quiet for a few days, as they are often the best remedies we can adopt—of course, with a proper observance of the laws of dietetics. In the hoped for good time coming I have often heard sung the cheering sentiment embodied in the words, "sickness and sorrow, pain and death are felt and feared no more." It is fine poetry, and who can tell but it may be practical prose in life to come, of which we hear so much. I think the doctors, as a general rule, are right down good fellows, and do the best they know to help us out of our physical troubles, but if we can realize a state of existence when we can do without their services, it will place us in that paradise of happiness of which poets sing, and in the idea of which all rejoice. Somebody has said—"may be he was a crusty fellow—that lawyers live on the follies, doctors on the miseries, and preachers on the wickedness of mankind." This is not truthfully said in disparagement of the professions, as I understand it, but rather in reference to the rest of us who seem to require the services of these professions.

For an invalid perhaps it is time that I should dry up, as these rambling thoughts may be occupying the place at more practical reading." F. New Lisbon, July 21, 1871.

Reported for the Independent.

7-30 GOLD LOAN

OR THE Northern Pacific Railroad.

Rapid Progress of the War

The building of the Northern Pacific Railroad, ( begun July last), is being pushed forward with great energy from both extremes of the line. Several thousand men are at work in Minnesota and on the Pacific coast. The grade is nearly completed 266 miles westward from Lake Superior; trains are running over 120 miles of finished road, and track laying is rapidly progressing toward the eastern terminus of Dakota, including the entire route of the St. Paul & Pacific road, the Northern Pacific Company now has 413 miles of completed road, and by September next this will be increased to at least 560.

A Good Investment.—Jay Cooke & Co. are now selling and unhesitatingly recommended, as a profitable and perfectly safe investment, the first mortgage loan grant gold bonds of the Northern Pacific Railroad company. They have 30 years to run, bear seven and three tenths per cent interest (more than 8 per cent currently) and are secured by first mortgage on the entire road, and its equipments, and also as fast as the road is completed on 23,000 Acres of Land to every mile of track, or 500 acres for each \$1000 bond. They are exempt from U. S. tax, principal and interest are payable in gold; Denominations: Coupons, \$100 to \$1000; Registered, \$100 to \$1000.

Lands for Bonds.—Northern Pacific 7-30s are at all times, receivable at ten per cent above par, in exchange for company's lands, at their lowest cash price. This renders them practically interest bearing loan warrants.

Sinking Fund.—The proceeds of all sales of lands are required to be devoted to the re-purchase and cancellation of the bonds of the road. The land mortgage bonds of the company, therefore, cancel the principal of the company's bonded debt before it falls due. With their ample security and high rate of interest, there is no investment accessible to the people, which is more profitable or safe.

Exchanging U S Five-Twenties.—The success of the new government five per cent loan will compel the early surrender of the 6 per cents. Many holders of five-twenty bonds are exchanging them for five per cent Pacific Seven-Thirties, thus realizing a handsome profit, and greatly increasing their yearly income.

Other Securities.—All marketable stocks and bonds will be received at their highest current price in exchange for Northern Pacific seven-thirties. Express charges on money or bonds received, and on seven-thirties sent in return, will be paid by the financial agents. Full information, maps, pamphlets, etc., can be obtained on application at any agency, or from the undersigned.

The following lines published in the Monthly Religious Magazine, for December 1876, read in the hall of subsequent events, have a singular history.  
They called the last-blessed, and stand made.  
But every word that falls  
Goes straight to the heart, and hits the mark—  
More sure than any other law  
Through spots of foam of foggy law  
It cuts its way to the heart.  
And judge and jury I have tried  
At God's great judgment seat.  
Old men, farewell! they'll take their life;  
For dangerous enough  
In these our sweetly piping times,  
Are men of less stuff.  
We should tread soft above the fires  
That underneath us lie.  
You'll crack the crust of compromise,  
And set them spouting high!  
But not the men of "Liberty"  
Once at the altar of truth,  
There's only one way left for two  
For honest men to fill.  
And after the spot the year will roll,  
As spring its verdant robes,  
And autumn of the fabled grave  
Shakes down its yellow leaves.  
But not the men of "Liberty"  
Will hold their like to be  
John Brown will trumpet "God with  
From blue ridge to the sea,  
Till the strong arm of heaven  
As I open, a green field  
And God's great charter holds and waves  
O'er all his humble people.  
A good rule: Pick your friends and  
face your enemies.  
Do you wish to get up with the  
lark? Then go to bed without it.  
Why are types like criminals? Be-  
cause it is to be prepared to lock them up  
without proof.  
Jones, was wrong when he ascribed  
the bad smell about the postoffice to  
the dead letters.  
The proverb that stolen kisses are  
sweet, is enforced by the fact, that  
they generally come from lasses.  
Why are potatoes and corn like cer-  
tain sinners of old? Because, having  
eyes, they see not, and having ears,  
they hear not.  
An Irish schoolmaster recently in-  
formed his pupils that the feminine  
gender should be applied to all ships  
and vessels afloat, except mail steam-  
ers and men of war.  
It is easy to exclude the noontide  
light by closing the eyes; and it is  
easy to resist the clearest truth by  
hardening the heart against it.  
In all differences consider that both  
you and your opponent are dropping  
off, and that ere long your very mem-  
ories will be extinguished.  
There are moments when petty  
slights are lauder to bear than even a  
serious injury. Men have died from  
the festering of a grudge bite.  
A colored barber out west, being  
subpoenaed to serve as a juror, was  
on usual examination asked, "Are you a  
voter?" and brought down the house,  
by answering, "No, black enough, but  
not old enough."  
A short time since, a Mr. Knott was  
tried in an interior county of Georgia  
for violation of law. The verdict of  
the jury was, "We find the defendant  
Knott guilty." The judge was at a  
loss whether to sentence Knott, or not  
to sentence. He took time to consid-  
er.  
A lady was once declaring that she  
could not understand how gentlemen  
could smoke. "It certainly shortens  
their lives," she said. "I don't know  
that," replied a gentleman. "There is  
my father, who smokes every blessed  
day and he is now seventy years old."  
"Well," was the reply, "he had never  
smoked he might have been eighty."

**Dr. J. LONG.**  
**Eclectic Physician,**  
Has located himself at Massillon, O., for the  
treatment of  
**Female & Chronic Diseases.**  
Office east of the Park, second floor of Mr.  
Polk's new building.  
All constitutional and examinations of pa-  
tients made free of charge.  
Dr. Long examines and explains your dis-  
ease without asking any questions. If he  
understands your case you know it, and you  
will not be deceived. If he cannot tell you your  
disease, you may feel without asking  
questions he does not consider himself com-  
petent to treat your case. This is the only  
Dr. and positive evidence of his ability as a  
scientific physician, and by this standard I  
am willing to be judged.  
A proper diagnosis of local disease, with-  
out constitutional symptoms, that is not af-  
fecting the system generally, must depend  
upon the judgement of both patient and  
physician.  
Give Dr. Long a call, and satisfy your-  
selves whether he understands your case  
sufficiently well to treat them successfully.  
Dr. Long may be consulted in the German  
and English languages. Address letters,

Price in a sealed envelope only six cents.  
The celebrated author in this admirable  
essay, comprehensively treats of the alarming  
consequences of self-abuse may be radically  
cured without the dangerous use of internal  
medicine or the application of the knife; re-  
storing to a man of force of mind, and vigor,  
certain, and effectual, by means of which  
every sufferer, no matter what his condition  
may be, may cure himself cheaply, privately  
and radically.
